

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFe® 4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

Professional Summary:

- ❖ **18yrs of experience** with Cloud technologies (Oracle Fusion Admin + Data Architect + Data Engineer)
- ❖ Experienced IT Strategic leader with a demonstrated history of working across multiple industries. Skilled in converging technical knowledge with business drivers to advise clients on their strategic direction. Deep technical knowledge in Infrastructure, Apps, Hosting, Application Management Services and AWS + Oracle Cloud XaaS (FaaS, SaaS, PaaS, IaaS, DBaaS) as well as a solid understanding of business capabilities in Finance, HR, Legal, Compliance and Internal Audit.
- ❖ TS cleared

Certifications/Awards:

- ❖ **Oracle Certified Professional 11G**
- ❖ **Oracle Certified Associate 10G**
- ❖ **Oracle Certified Grid/Cluster ware/RAC 11G**
- ❖ **Best Oracle Apps DBA Team member from OSI Consulting**
- ❖ **Certified SAFe® 4 Scrum Master**
- ❖ **Primatics Awarded for designing Data Center Architecture**
- ❖ **EMC Unified Storage Certified**
- ❖ **Oracle Cloud Associate certified**
- ❖ **CompTIA Security + Certified**

Technical Skills:

E-Business Suite	Oracle Fusion, E Business Suite 11.5.3, 11.5.8, 11.5.9, 11.5.10, R12.1, R12.2
Application Servers	Oracle Application server 10g, OID, OBIA, OBIEE, Weblogic, EMGrid13.5
Oracle Version	Oracle 8i, 9i, 10g ASM + RAC, 11g ASM + RAC, 12C
Languages	SQL, PL/SQL, Perl, shell Scripting, Python
Operating Systems	Linux, Windows, Solaris, AIX
Tools	Erwin, Informatica
Opensource	NoSql, git, Packr, Odo, Docker, Gitlab, Spark, hive
CICD technology	Ansible, Jenkins
Opensource RDBMS	Postgres, MySQL, MariaDB, MongoDB
AWS	EC2, S3, Cloud Formations, OpsWorks, IAM, RDS, Lambda
Google Cloud	BigQuery, functions, Object Storage, IAM, Terraform
Oracle cloud	Terraform, Kubernetes, git, OCI Stack (Resource Manager), ATP, OCI, VBCS, Security Architecture for SaaS

Experience:

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleebsblog.wordpress.com ©405-423-8584
--	---	---	--	--

UniFirst Services.

Aug 2023 – Till date

Fusion Consultant / OCI Architect /EPM Specialist

- ❖ Oracle Enterprise Performance Management (EPM, ARCS, EDMCS, EPBCS, FCCS)
 - Create & run Integrations of EPM with other financial systems as source
 - Serve as the technical owner and system administrator for our core EPM platform, responsible for the technical roadmap and integrity of the system.
 - Design and govern the critical data pipeline between the EPM system and high-stakes downstream platforms, including executive reporting systems and our self-service analytics environment, Foundry.
 - write complex workflows, business rules, models, and calculation logic to automate core financial processes
- ❖ Oracle Fusion + OCI Security Administration:
 - Design functional roles + Data roles (HCM) and promote to production based on business requirements (HCM, Financials, Supply Chain).
 - Setup users + role + data access as part of non-prod implementation support and automated whole process using python scripts which reduced post clone effort.
 - SSO setup through AD + OKTA for OTM, CPQ, OFS, VBCS, DCS, OCI Console
 - OAuth integration setup between OIC & OFS
 - OAuth Integration setup between OTM and OCI
 - Provision new OFS / OTM instances for project implementations.
 - Migrate ESS jobs from non-prod to prod and schedule as per business requirements.
- ❖ Oracle Integration:
 - POC for all integration issues
 - Wrote script to report on integration failures on daily basis.
 - Setup integration connections and perform integration deployments.
 - Provision new OIC instances as required.
- ❖ Oracle ATP, ADW & Exacs:
 - Provision new databases as per high availability requirements of business
 - DBA Support
- ❖ Reports (Fusion Analytics Workspace (FAW) & Fusion Data Intelligence (FDW)):
 - Develop FDI DW from source SaaS, EPM & develop reports
 - Fix HCM Reports security based on audit requirements.
 - Performance tuning of custom reports
 - Configure security of reports based on SOD.
 - Automate alerting of failed jobs to various consumers on daily basis
- ❖ Integration of DCS with Fusion + CX
- ❖ Oracle Cloud Infrastructure Engineering/Architect
 - Architect & Manage Backup and DR Strategies using Object Storage, Oracle Managed Backups, and Autonomous Data Guard.
 - Architect & Manage Network (VCN, Subnets, DNS, LBAAS) and user Security groups, IAM, Federated IDCS, and compartments.
 - Architect & monitor all services, their access, availability, performance, and usage.
 - Architect & Configure, Manage, Audit, and Alert on the Security of the OCI environment using Observability tools.
 - Architect & Implement Best Practices for the PaaS/IaaS services lifecycle.

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- Good knowledge of networking concepts - the OSI model, TCP/IP, routing, firewalls, and load balancers.
- Architect & Manage Vulnerability (patching) management of marketplace images, golden images, and deployments.
- Deploy and Manage Computes (VMs) and PaaS Services in OCI.
- Manage IDCS/SSO/SAML implementation, policies, and governance process.
- Identify, analyze, and maintain secure configurations across our technologies (hybrid cloud).
- Identify, recommend, design, and maintain technology solutions to help support the enterprise's security posture and needs.
- Implement cloud guard with detectors & responses for continuous monitoring of compliance, malicious activity, data governance etc...
- Track cloud changes through Terraform scripts checked into GIT for change tracking
- ❖ Observability & Manageability
 - Configure logging for all PaaS services into Oracle logging through log groups
 - Ingest logs from custom apps into oracle logging through agent configuration
 - Create alarms based on metrics for warning & critical events
 - Configuration notification to send alerts to KNOC & per team basis
- ❖ Oracle E-Business Suite
 - Day-to-Day Support and maintenance for E-Business suite 12.2.10
 - Migration to Fusion support to EBS
 - Support activities of cloning, patching using ADOP, Troubleshooting of migration issues

Astec Industries

Jul 2022 – Aug 2023

- ❖ Oracle Fusion + OCI Security Administration:
 - Design functional roles + Data roles (HCM) and promote to production based on business requirements (HCM, Financials, Supply Chain).
 - Setup users + role + data access as part of non-prod implementation support and automated whole process using python scripts which reduced post clone effort.
 - SSO setup through AD for OTM, CPQ, OFS, VBCS, DCS, OCI Console
 - OAuth integration setup between OIC & OFS
 - OAuth Integration setup between OTM and OCI
 - Provision new OFS / OTM instances for project implementations.
 - Migrate ESS jobs from non-prod to prod and schedule as per business requirements.
- ❖ Oracle Cloud Infrastructure Engineering/Architect
 - Architect & Manage Backup and DR Strategies using Object Storage, Oracle Managed Backups, and Autonomous Data Guard.
 - Architect & Manage Network (VCN, Subnets, DNS, LBAAS) and user Security groups, IAM, Federated IDCS, and compartments.
 - Architect & monitor all services, their access, availability, performance, and usage.
 - Architect & Configure, Manage, Audit, and Alert on the Security of the OCI environment using Observability tools.
 - Architect & Implement Best Practices for the PaaS/IaaS services lifecycle.

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- Good knowledge of networking concepts - the OSI model, TCP/IP, routing, firewalls, and load balancers.
- Architect & Manage Vulnerability (patching) management of marketplace images, golden images, and deployments.
- Deploy and Manage Computes (VMs) and PaaS Services in OCI.
- Manage IDCS/SSO/SAML implementation, policies, and governance process.
- Identify, analyze, and maintain secure configurations across our technologies (hybrid cloud).
- Identify, recommend, design, and maintain technology solutions to help support the enterprise's security posture and needs.

Department of Homeland security

Jun 2019 – Jun 2022

- ❖ Migration of On-Prem EBS Instance to AWS Cloud with RAC Database 19c 2 nodes
- ❖ Upgrade EBS R12.2.7 to R12.2.10 with 19c Database + Grid upgrade
- ❖ Implement OEM 13.3, upgrade to 13.4 for 140+ server in AWS + integrated Oracle Database proactive monitoring utilizing Incident rules + Events + notifications.
- ❖ Implementation of OEM Application management pack for R12.2.10
- ❖ Automation of DB Fleet startup + shutdown + maintenance using OEM for patching and maintenance
- ❖ Support activities of cloning, patching using ADOP, Troubleshooting of upgrade issues
- ❖ Tuning of OBIEE using performance testing with 2500 users
- ❖ SSO Implementation using OAM+OID (upgrade to OUD)
- ❖ Worked on Exadata Oracle Home patching & cloning Databases using snapshot-based clones.
- ❖ Tuning of EBS JVM + Database to meet new business line implementation with 2500 users.
- ❖ Install + setup of Enterprise Command center for projects + integration with EBS R12.2.10
- ❖ Architecture support for AWS cloud architecture for infrastructure components and performance testing block volumes + building gold images to repetitive deployments

United States Army (BCT)

Jan2019 – Jun2019

Completed United States Army Basic & AIT Training

Federal Aviation Administration

Apr2017 – Dec2018

Client : Federal Aviation Administration
Project Type : Oracle Enterprise Manager Implémentation
Software : Oracle Enterprise Manager (EBS Plugin, DB Plugin, Host Plugin, Exadata & Storage plugin
DB environment : 12C

- ❖ Support & Maintenance to EBS 12.2.13 install with sso setup with OAM
- ❖ Implementation & configuration of OEM for monitoring + alerting + Host Patch management of 500 Linux Hosts
- ❖ Implementation & configuration of OEM for monitoring + alerting + OH patching + cloning of 200+ databases automation
- ❖ Implementation & configuration of OEM for monitoring + alerting + OH patching + Apps Patching + cloning automation of Oracle EBS instances including Apps Stack.

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecbsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Implementation & configuration of OEM for monitoring + alerting of Exadata + Netapp storage servers
- ❖ Provide documentation on how-to's for post implementation maintenance of OEM & its agents.
- ❖ Building custom plugin in python and automation of custom process integrating with OEM

Oracle Consultant:

Center for Medicaid & Medicare

Jul2015 – Mar 2017

Client : Center for Medicare & Medicaid
Project Type : Upgrade, Support & Maintenance, Production Support
Software : WebLogic 11G, SOA, IDM Suite, Oracle Service Bus, Oracle Business Intelligence
DB environment : 11G, 12C

- ❖ Support production to meet SLA of 99.99% for government website: <https://www.qualitynet.org> through weekly & monthly maintenance involving code deployments, configuration changes, upgrades, migrations.
- ❖ Build new environments for TEST + DEV + SIT + UAT environments each vertical containing more than 20 WebLogic environments including packaged & non-packaged software
- ❖ Working on new project initiatives of upgrades of non-production environments to meet new consumer demands across country.
- ❖ Upgrade IDM from 11.1.7 to 11.1.9 patch set

Center for Medicaid & Medicare

Aug 2014 – July2015

Client : Center for Medicare & Medicaid
Project Type : Upgrade 11.5.10 to R12.2.2
Software : 12.2 E-Business suite 4 node Apps Services
DB environment : 11.2.0.3 **Database RAC 2 node**

- ❖ R12.2.2 Upgrade driver tuning to reduce duration of upgrade from 70hrs to 34hrs
- ❖ Implementation of Shared Application Top for R12.2 with 4 nodes helps in reducing ADOP patching durations
- ❖ Support activities of cloning, patching using ADOP, Troubleshooting of upgrade issues
- ❖ Integration of custom tops and implementation of custom driver sync process to keep custom change sync across file system switch
- ❖ Post Upgrade Support of R12.2.2
- ❖ Reorg of APPS objects into new tablespace

Amway

Nov 2013 – July 2014

Client : Alticor/Amway Corp
Project Type : Infrastructure Assessment, scalability/Stress testing, Performance Assessment
Software : 12.1 E-Business suite 5 node (Exalogic) with 2 DMZ tiers, SSO-OAM
DB environment : 11.2.0.3 **Database RAC 4 node (Exadata)**

Responsibilities:

- ❖ Develop framework for performance/Scalability testing of E-Business Suite
- ❖ Develop scripts to collect metrics for database and application hosts to be presented for higher management

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Assessment of current infrastructure scalability and pit falls with Exadata Layout
- ❖ Propose solution for more robust layout of Exadata infrastructure and effective utilization and show differential ROI
- ❖ Automation of Patching process across 9 instances with PPM orchestration
- ❖ Implementation of **OAM** for complete Alticor Org with diverse groups and policies for authentication and authorization
- ❖ POC for upgrade of R12.1.3/11.2.0.3 to R12.2 with Database 12.2

Primatics Financial LLC

McLean, VA

Apr-2010 – Nov 2013

Primatics enables financial institutions to evolve by providing enterprise-grade software and proven business advisory services driven by strong domain expertise to enable customers to better account, value and analyze loan portfolios, comply with regulations and grow their business in today's rapidly changing market and regulatory environment.

Project Type : Implementation, Upgrade, Performance Tuning, Development/Support for day2day support, Backup, High Availability
Software : 12.1 E-Business suite 3 node with 1 dmz tier, SSO-OID, OBIEE
DB ENV : 11.2.0.3 **Database RAC 4 node**

Responsibilities:

Equinix Datacenter

- ❖ Design of new Datacenter Architecture for Oracle Database, worked with third party vendors to buy Oracle licenses and setup EMC VNX 5300
- ❖ Tuning for SAN and DAS devices for optimal IOPS and throughput required by Database

Amazon AWS

- ❖ Wrote PLSQL Amazon API to Backup Oracle schemas using data pump and store them in Amazon S3 Storage
- ❖ Designed & Implemented disaster recovery of Oracle Database in Amazon EC2 with 24hr RPO and RTO
- ❖ Tuning of file storage in Amazon S3 from Amazon EC2

Oracle Applications

- ❖ Install/Maintenance/Support of Oracle Application 2 web-tier, 2 Middle-Tier R12.1.3
- ❖ Upgrade of EBS from 12.0.3 12.1.3
- ❖ Upgrade Cluster/RAC infrastructure from 10G to 11G

Fusion Middleware

- ❖ Install/Maintenance/Support of Oracle SOA
- ❖ Support for migration of web apps from TEST to PROD environment
- ❖ Configuration of SOA components

Oracle Database

- ❖ Install/Maintenance/Support of Oracle database RAC 4-node version 11.2.0.3
- ❖ Configure Backup & Recovery, design & test DR strategy using RMAN
- ❖ Design **disk architecture** for Data Warehouse environment to get best performance out of disks to support massive data warehouse environment of 14 TB
- ❖ Installation **Oracle Enterprise Linux** OS required for installing Oracle on servers and setup Ldap access to Linux
- ❖ Installation and configuration of Oracle Enterprise Manager with Hierarchy monitoring and alerting
- ❖ Re-architecture of Datacenter for Failover of EBIZ instance
- ❖ Implementation and support for EBIZ R12
- ❖ Implementation of RMAN backup to NFS disk with policy of every 1hr backup of archive logs and Cumulative backup every night and Full back up on every Sunday
- ❖ **Perl and shell scripting** as required for loading users and maintenance activities with DBI module of PERL

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @:vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Change in backup strategy and troubleshooting backup problems with read-only tablespace
- ❖ Knowledge transfer of maintenance scripts and architecture to on-site dba
- ❖ **Partition** of large table based on key search columns of the table using **hash, value and range partitioning**
- ❖ **Sql tuning** based on **v\$optimizer_env, v\$sql_plan_stats**, and **optimizer stats** based on **density** and **selectivity** using **SQL Tuning Advisor** and **SQL Access Advisor**
- ❖ Performance tuning of reports and Database tuning
- ❖ Developed UI using Oracle Application Express to automate schema replication between PROD and non-PROD databases

Informatica & Alfresco

- ❖ Installation of Informatics Power Center 9.1.0 for ETL implementation of client data to Standard data API
- ❖ Worked on Data integration architecture and workflow for data from clients by complying with archival policies

Performance Tuning

- ❖ Performance Tuning of Application SQL and PLSQL
- ❖ Performance tuning of Database which is 14TB size Data warehouse environment

Sunera Technologies

Aug 2008 – Mar 2010

Provided Oracle Application DBA services to the following customers

NJVC (DOD client)

Client : NJVC corp
Project Type : Install, support, maintenance, Data Guard, performance Tuning
Software : 12.1 E-Business suite 3 node with 1 dmz tier, SSO-OID
DB environment : 10.2.0.3 **Database RAC 2 node**

Responsibilities:

- ❖ Upgrading database from 10.2.3 to 11.0.7 EBS database
- ❖ Implementation of RAC 11.0.7 2 node on Linux x64 architecture
- ❖ Implementation of Data guard for 11.0.7 database with physical standby
- ❖ Creation of workload services for various database connections with fail over and connection management with failover
- ❖ Installation and configuration of **SOA/BPEL** for integration with **OTM** and Strong in **Weblogic** administration
- ❖ Regular administration work of patching, cloning, tuning as required, and troubleshooting of user issues
- ❖ Support for **MS SQL server database** and regular administration activities
- ❖ Tuning of concurrent workers, database parameters, redo log file size, implementing security best practices and backup best practices
- ❖ Configuration of **I-Setup** and **I-Expenses** on R12.1 for various functional requirements
- ❖ Installation and configuration **Demantra** for reporting of supply chain analysis
- ❖ Cloning, Tablespace maintenance, troubleshooting of Concurrent programs
- ❖ **Tuning** of DB and **SQL** and **PL/SQL** based on stats and table clustering and various other factors of table organization across different data files
- ❖ Support for **Windows based oracle Database** and preparing **power shell scripts** for cloning and regular and required database activities
- ❖ **Perl and shell scripting** as required for loading users and maintenance activities with DBI module of perl
- ❖ Change in backup strategy and troubleshooting backup problems with read-only tablespace
- ❖ Knowledge transfer of maintenance scripts and architecture to on-site administrator
- ❖ Implementation of streams or **iRecruitment** module for system availability during maintenance for reducing the downtime for the end users

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Implement **SOX compliance** regulations for database user privileges and auditing of database for vulnerability
- ❖ Installation and configuration of **OBIA**, Informatics, **DAC** Data warehouse
- ❖ Tuning of Database and Application for around 3000 users tuning of **JVM** instances
- ❖ Experienced in data analysis techniques and has worked in the migration of databases to new systems
- ❖ Answers user questions. Confers with coworkers to determine impact of data base changes on other systems
- ❖ Strategic design of database for future development and growth of database

SeverstalNA

Client : Severstal NA Steel
Project Type : Up gradation, Configuration, Maintenance
Software : **R12, RHEL AS x86x64, R12 SSO OID- AD, SOA, AIA, PIP, Viziya, Noetix**
DB environment : **2-Node RAC, 11G**

Responsibilities:

- ❖ Implementation of R12.0.4
- ❖ Total of 5-node configuration with database 2 node and application 2 nodes for internal access and **DMZ** with **i-Supplier portal, iProcurement** for **external** access with shared oracle home and **tuning of JVM** for both internal and external nodes
- ❖ Implementation of **Oracle Application Server** for **OID/SSO** and **Apex** external application and authentication purpose
- ❖ **Tuning of Workflow** to handle **iProcurement Business events** efficiently
- ❖ **Tuning of DB** to perform well with hash joins and nested loop joins and **SQL tuning** based on necessity for concurrent reports taking longer time and advising developers on bad queries
- ❖ Implementation of Load testing tool **Real Application Testing 10g** and report analysis of output file and replicating load on TEST systems to improve performance of production
- ❖ Query analysis using **SQL performance** analyzer and **dbms_advisor** and based on view **v\$sql_plan, v\$sql_optimizer_env, v\$sql_session_wait**
- ❖ Setup of **Read-only Responsibility** for Support and issue replication purpose by creating –registering custom user with FND and giving it read only privileges which will eventually decrease the maintenance time for responsibility creation and assigning
- ❖ **SYSADMIN** activities for responsibility and menu and function, user
- ❖ Good knowledge on **CBO plans** and changes that affect the **SQL** based on **statistics** that get generated
- ❖ Creating **histograms** manually and using **dbms_stats** based on size and data type of the table
- ❖ **Partition** of large table based on key search columns of the table using **hash, value and range partitioning**
- ❖ **SQL tuning** based on **v\$sql_optimizer_env, v\$sql_plan_stats**, and **optimizer stats** based on **density** and **selectivity, bind peeking**
- ❖ Deploying of **PCP for Concurrent** and fine **tuning** of scheduled programs and increasing the cache for queue and handling SFM efficiently
- ❖ Creating **PL/SQL procedures** as required for business requirement for fixing business defects
- ❖ Configured **AD-OID-EBIZ** provision 3 type setup and import connector
- ❖ Regular maintenance, patching, cloning and troubleshooting
- ❖ Installed and configured **OBI standard** edition and integration with **SSO**
- ❖ Installed, maintained and supported **Viziya and Noetix** tools
- ❖ Planned and Configured the **RMAN** and backup strategies
- ❖ Fine-tuned the java-based application such as forms oacore
- ❖ Configured the DMZ tier with reverse proxy for external users with i-setup and i-procurement responsibilities.

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Configured and tuned the workflow mailer
- ❖ Installed and Configured the Grid control and its agents on all prod and test nodes, configured the notification and rules and metrics as required
- ❖ Shell scripts for **RMAN** backup, rotating alert logs, file system maintenance

ASM Technologies

Aug07 – Mar08

Hyderabad

Oracle Corporation (Oracle on Demand)

E-business Suite : Oracle Application 11i, R12 Multi node, shared-Application Top, shared Oracle Home, portal, SSO, SSL
Project Type : Configuration, Support & Maintenance
Software : **RHEL AS 4.0, 5.0**, Oracle Enterprise Linux, Sun Solaris 9, 10, HP- Unix, AIX 5,6
Database : Oracle 8i, 9i, 10g RAC

Responsibilities:

- ❖ Imparted training to the team members on Patching activities and Autoconfig customizations
- ❖ Worked in change management (configuration queue) team for Tier 1 & 2 (critical) Clients
- ❖ Configured the external and internal and reverse proxy **DMZ** servers
- ❖ Expertise in making configurationally changes across database and application including Autoconfig customizations
- ❖ Installed and configured the **Oracle Grid**
- ❖ Worked on Financials, Marketing, Manufacturing, and Human Resource, Project management, Supply chain management
- ❖ Analysis of SQL plans using **SQL performance analyzer** and getting the new plans from **dbms_advisor** and fixing the resource intensive SQL in TEST systems and then moving the fixes to PROD
- ❖ Query analysis using **SQL performance analyzer** and **dbms_advisor**, **dbms_sqltune**, **dbms_sqldiag** and based on view v\$sql_plan, v\$optimizer_env, v\$session_wait etc...
- ❖ Migrated standalone database to **RAC** database 2 nodes
- ❖ Migration of 2-node application node to shared Application top
- ❖ Staged patching for upgrade of E Business Suite from 11.5.8 to 11.5.10.2
- ❖ Planning of Database security enhancements
- ❖ Tuning of Database and applications with change of relevant parameter changes and tuning of concurrent managers
- ❖ Experience in working in complex architecture with 5 **PCP** nodes and 3 **RAC nodes** with database of 2TB
- ❖ Expertise in DMZ configuration with 2 external web tiers
- ❖ Experience working in 24X7 support model

OSI Consulting Ltd

Jul05 - Aug07

Hyderabad

Provided Apps DBA services to the following customers during my employment with OSI

Rogers & Holland

Client : **Rogers & Holland**
Project Type : Upgrade / Support
Software : RedHat AS 4.0, Oracle 10g, Oracle Application 11i

Responsibilities:

- ❖ Installed E-Business Suite 11.5.10.2 on 2 nodes and upgrade to 11.5.10 CU 2

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oraclecbsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Oracle Application database upgrade from 9.2.0.5 to 10.2.0.2
- ❖ Session monitoring included identifying Long Idle sessions and High Active sessions, High CPU consuming sessions, long running sessions, blocking sessions and resolving them without affecting the performance.
- ❖ Storage monitoring included identifying tablespace sizing limitations, datafile extent limitations and maximum extent limitations
- ❖ Patch analysis and Applying Mini packs
- ❖ Cloning of oracle application environments from production to Test, Development and Patch instances
- ❖ Apache server monitoring and troubleshooting included monitoring Apache Log files, Apache availability, and troubleshooting IAS configuration Using AOL/J setup tests, testing java servlet configuration and monitoring the JVM pool
- ❖ Issues like user and profile level changes after cloning were handled with ease
- ❖ Performance Tuning of Applications and database
- ❖ Scheduling scripts using crontab
- ❖ Preventive Maintenance included gathering statistics, recompiling invalid objects, rotating log files, rebuilding indexes, purging concurrent requests, purging workflow history, purging and archiving data
- ❖ Database Monitoring included monitoring alert log, listener log, and database availability
- ❖ Interacting with oracle support to resolve application issues

REMO Drums USA

Client : **Remo Drums**
Project Type : Installation / Support
Software : Linux As4.0 64-bit and 32-bit, Oracle 9i, 10 g RAC Oracle Application 11i Multi-node

Responsibilities:

- ❖ Planned & Installed E-Business Suite 11.5.10.2 on single node and Multi node environments
- ❖ Standby/Data guard configuration using physical standby method (Disaster Recovery)
- ❖ Splitting the configuration of single node database to 64-bit **Multi-node** E-Business Suite
- ❖ Implemented scripts for space, database and concurrent managers alerts
- ❖ Prepared the backup strategy for the Oracle APPS Instances and Implemented Backup scripts
- ❖ Estimation and Planning future storage requirements for the database / Application system
- ❖ System Administration Activities, Concurrent Manager Management, Printer Setup, and User Creation
- ❖ Participating in team lead meeting, weekend plan meeting and process meetings
- ❖ Performance stats generation and administering various issues using the OAM
- ❖ Patch analysis and Applying Mini packs
- ❖ Cloning of oracle application environments from production to Test, Development instances
- ❖ Interacting with oracle support to resolve application issues

Robbins & Bros

Client : **Robbins & Bros**
Project Type : Maintenance / Support
Software : Linux, Oracle 9i RAC 2-nodes, Oracle Application 11.5.9, RAC 2-node, 2-nodes **PCP**, 3 web-nodes

[Robbins Bros World's Biggest Engagement Ring Store](#) located in 16 cities providing romantic gifts for all kinds of occasions providing best Client support.

Responsibilities:

 ORACLE® Certified Professional Oracle Database 11g Administrator	 ORACLE® Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator	 U.S. ARMY	 SSM SAFE4	Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
--	---	---	--	--

- ❖ Upgrade of 11.5.9 to 11.5.10.2
- ❖ Providing DBA Support to ensure 24x7 DBA support
- ❖ Cloning of Oracle application environment from production to test and development instances
- ❖ Used Oracle Application tools for maintaining database and application like adpatch, adadmin, adctrl, adsplice
- ❖ Standby/Data guard configuration using physical standby method (Disaster Recovery)
- ❖ Monitoring the Oracle EBS environments to ensure smooth working
- ❖ Concurrent manager administration and configuring **PCP** (parallel concurrent processing)
- ❖ Applying major Patches for applications
- ❖ Table space Maintenance
- ❖ Interacting with oracle support to resolve application issues

Paramount Farms

Client : Paramount Farms
Project Type : Maintenance / Support
Software : RedHat As 4.0, Oracle 9i, 10g Oracle Application 11.5.9

Responsibilities:

- ❖ Upgraded the database from 9.2 to 10.2
- ❖ Provided DBA Support to ensure 24x7 DBA support
- ❖ Cloning of Oracle application environment from production to test and development instances
- ❖ Used Oracle Application tools for maintaining database and application like adpatch, adadmin, adctrl, adsplice
- ❖ Database patches using OPatch tool
- ❖ Table space Maintenance
- ❖ Monitoring Applications and Database Backups
- ❖ Automation of manual day to day activates using Concurrent programs
- ❖ User creation setups, Creation of Responsibilities
- ❖ Interacting with oracle support to resolve application issues

RedDot Corp

Client : REDDOT Corp USA
Project Type : Migration / Support
Software : Redhat Linux Advanced Server 4.0, Windows 2003 server, Oracle 9i, Oracle Application 11.5.10.2

Responsibilities:

- ❖ Migration of 11.5.10 from windows 2003 server to 2 nodes Red hat Linux As4.0
- ❖ Designed backup and recovery strategy for the Oracle database. Setup Hot, Cold backup using **RMAN**. Tested all the backup/restore scenarios
- ❖ Carried out Database Space management. Monitored database growth with help of OEM and scripts
- ❖ Upgrading Database from 9.2.0.2 to 9.2.0.8 and Application from 11.5.10 to 11.5.10.2
- ❖ Configured standby database/Data guard and RAC for providing fault tolerance and performance improvement
- ❖ Performed security management by creating users, providing grants, roles and privileges
- ❖ Performed Redo logs management and tuning by creating new members and resizing them
- ❖ Applying database and application patches
- ❖ Concurrent manager administration and creating respective managers necessary as necessary
- ❖ Cloning the Oracle Application from Production environment to Test and Development environment

 Certified Professional Oracle Database 11g Administrator	 Certified Expert Oracle Real Application Clusters 11g and Grid Infrastructure Administrator			Vamshi Krishna Damidi @vkdvamshi@outlook.com https://oracleecsblog.wordpress.com ©405-423-8584
